Life is a human right!

Government Expenditure for Health per capita including International Cooperation, 2013

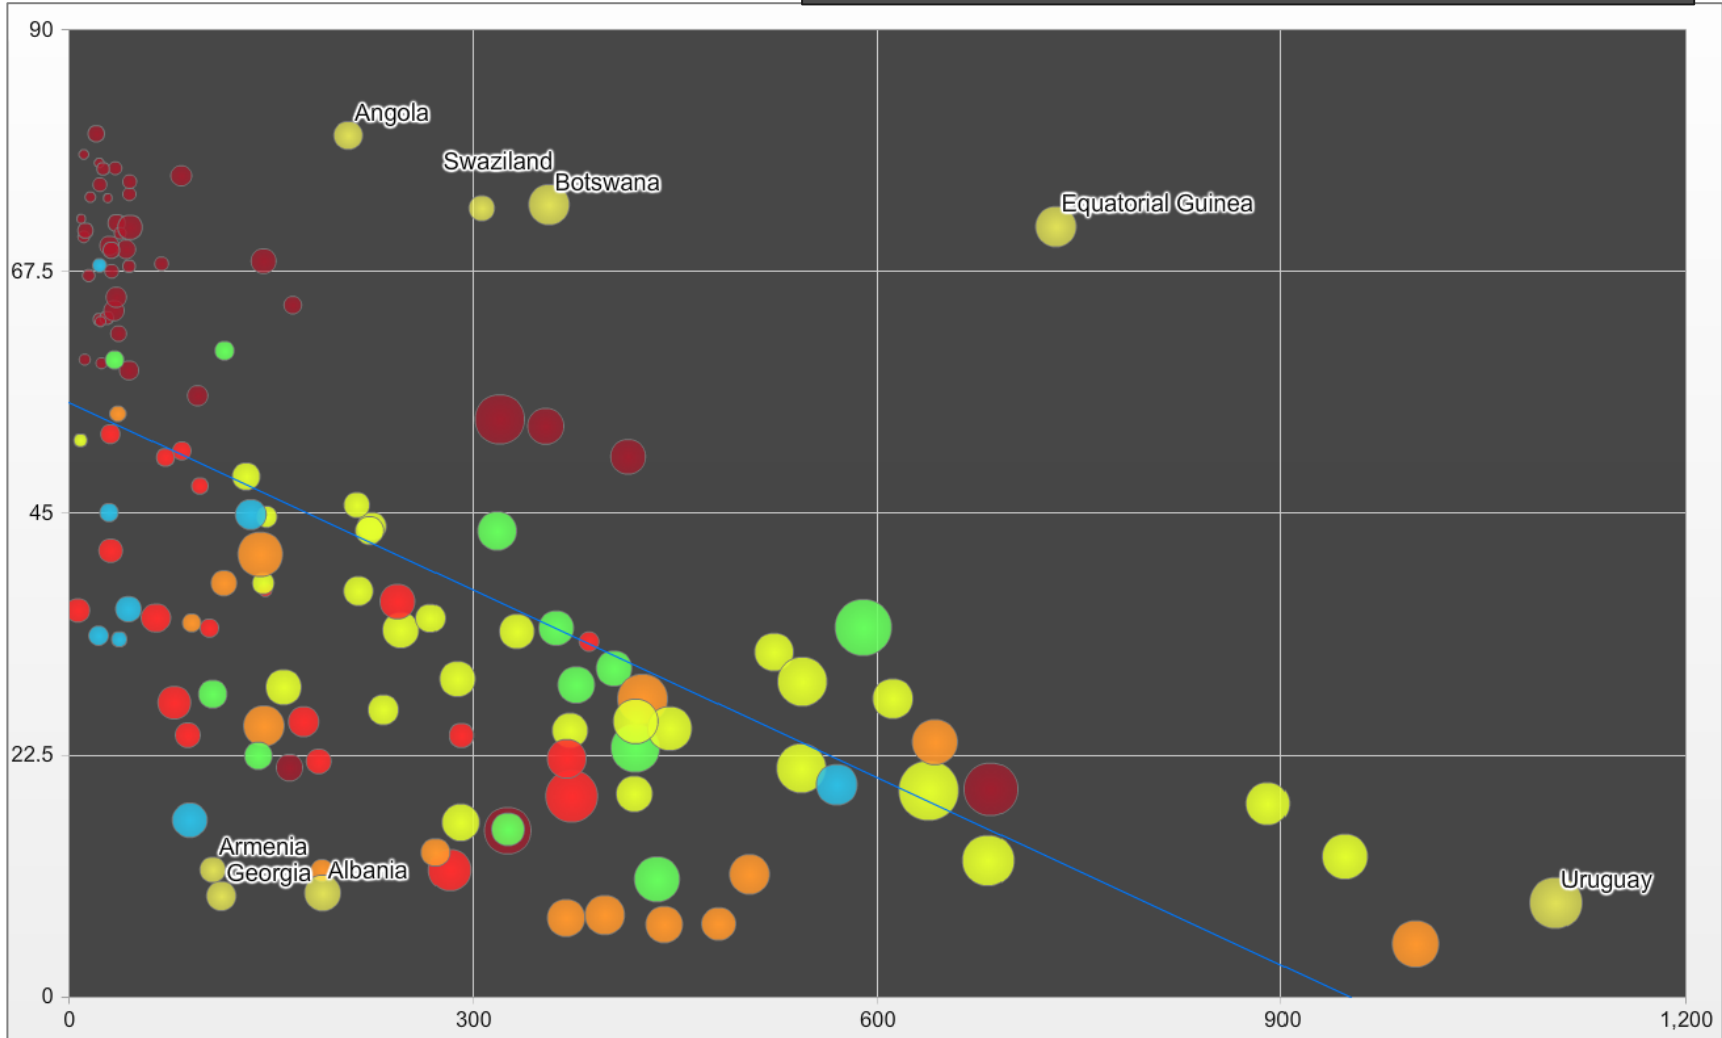

Percentage of Deaths that Occurred in People Aged 0-50 Years

Public Health Expenditure and Premature Deaths

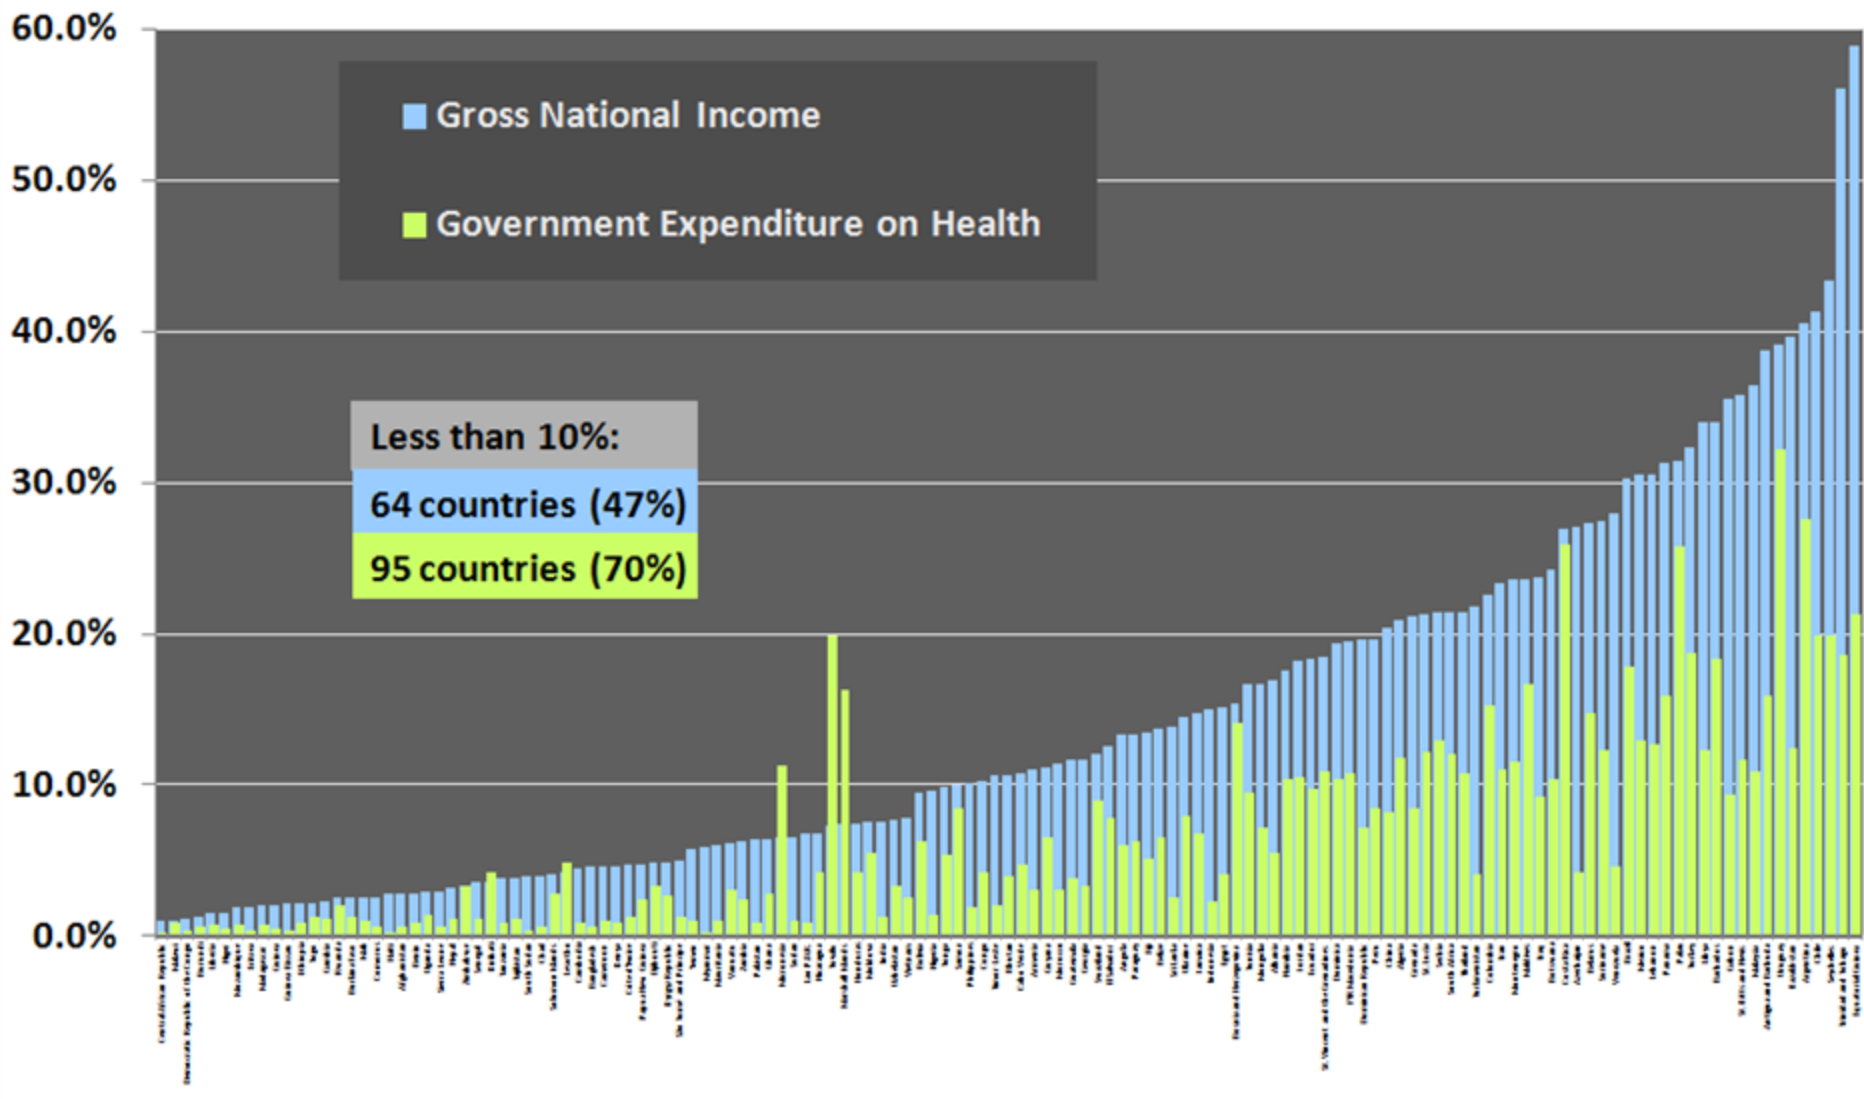

Bubble Size Represents GDP per capita

% of All Deaths that Occurred in People Aged 0-50

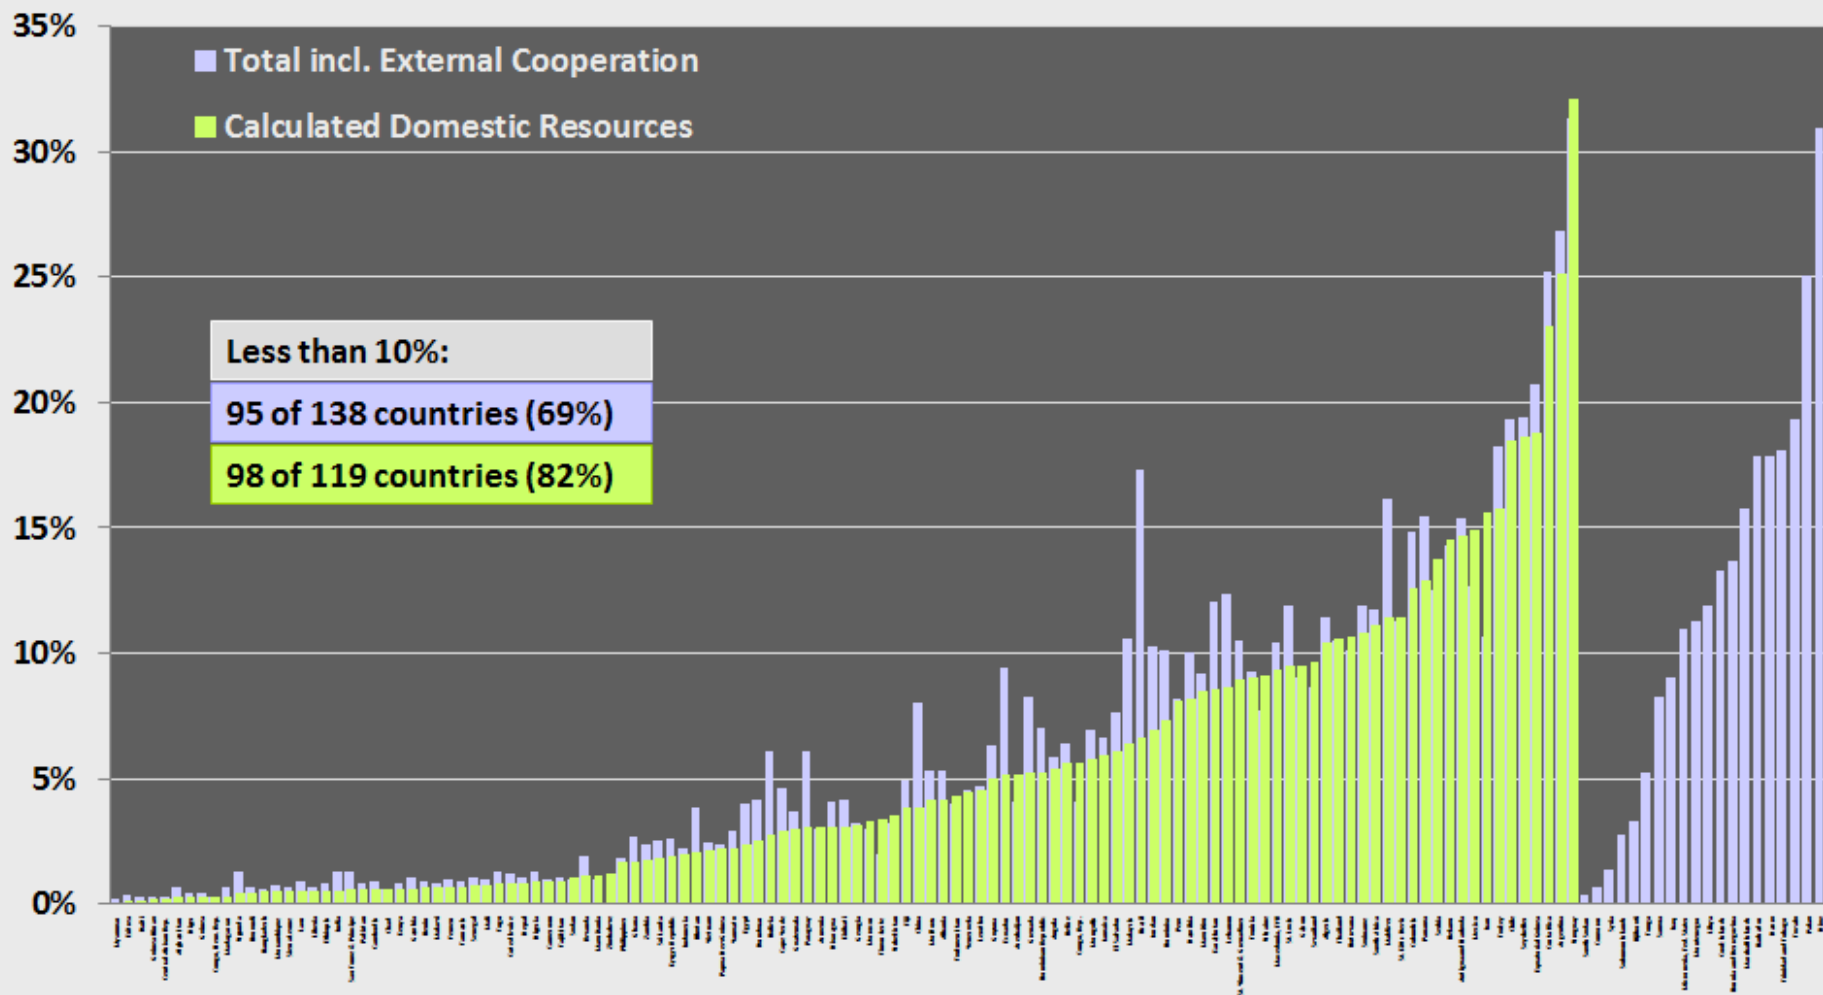

Government Expenditure on Health per capita, mixed calculation

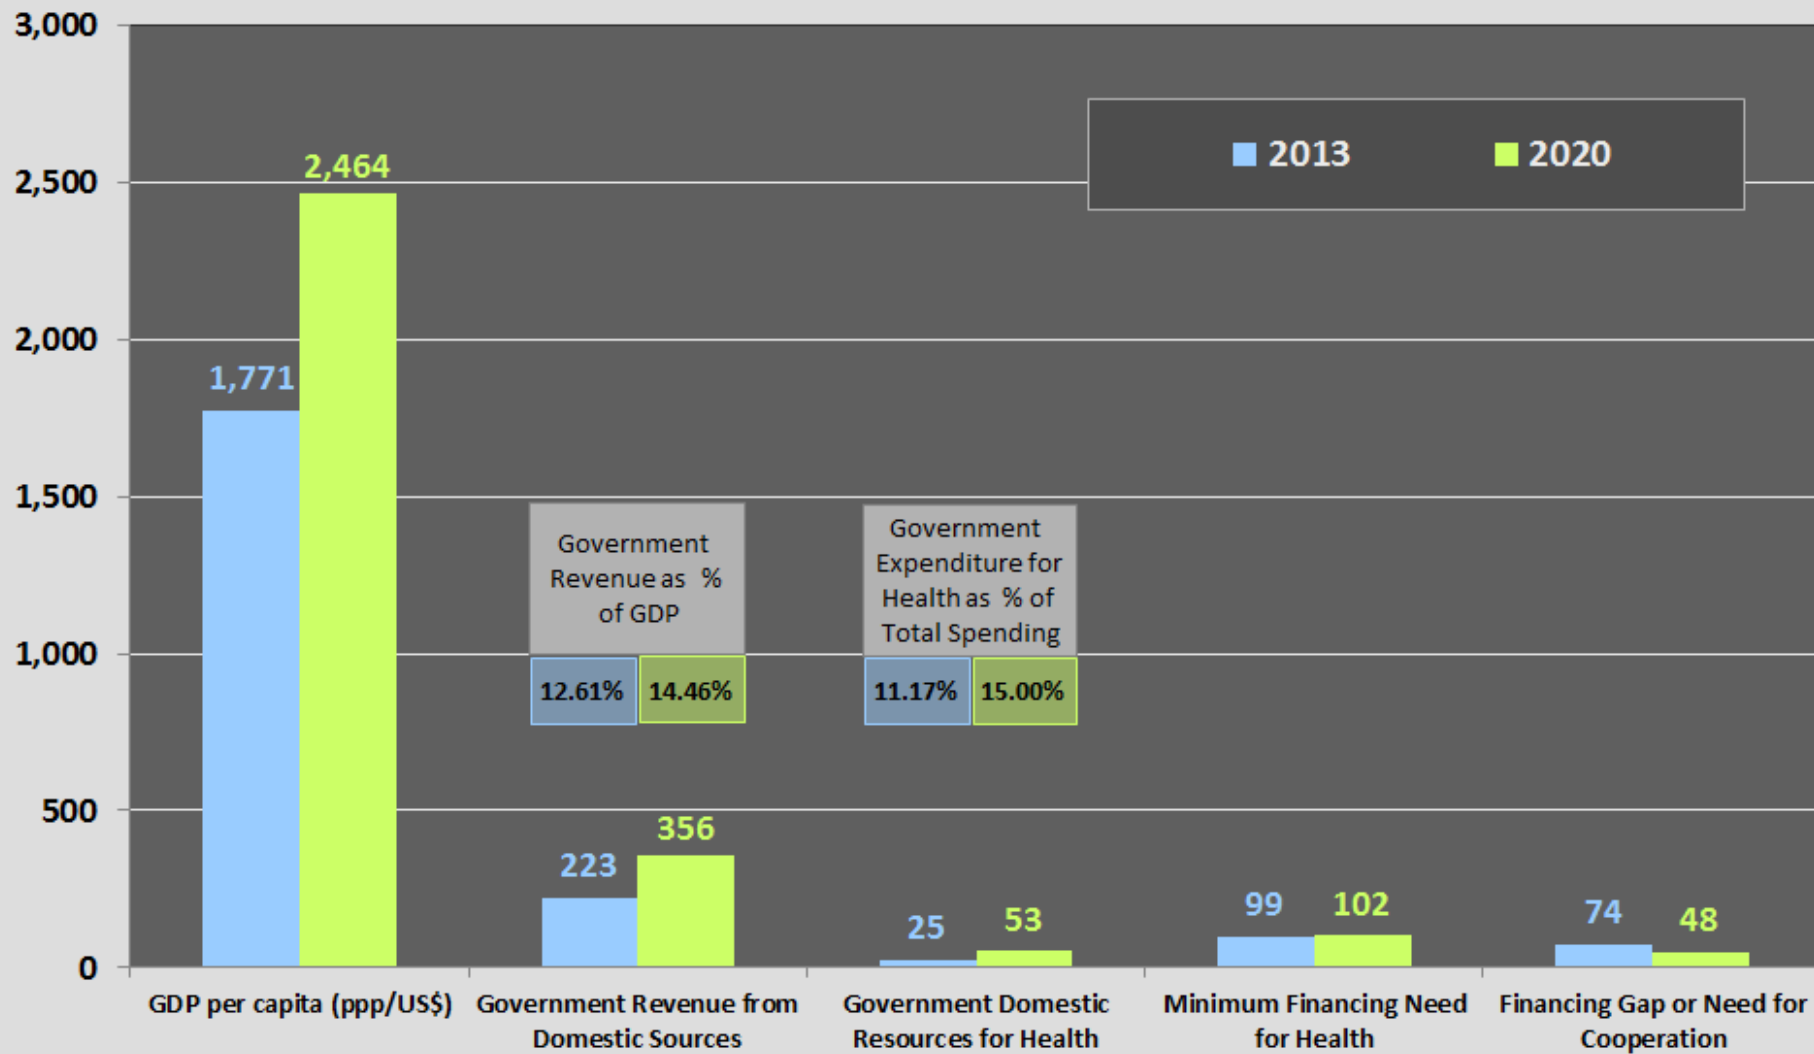

Gross National Income and Government Expenditure on Health of 135 Developing Countries as percentage of the Average of DAC/OECD Member States in 2013

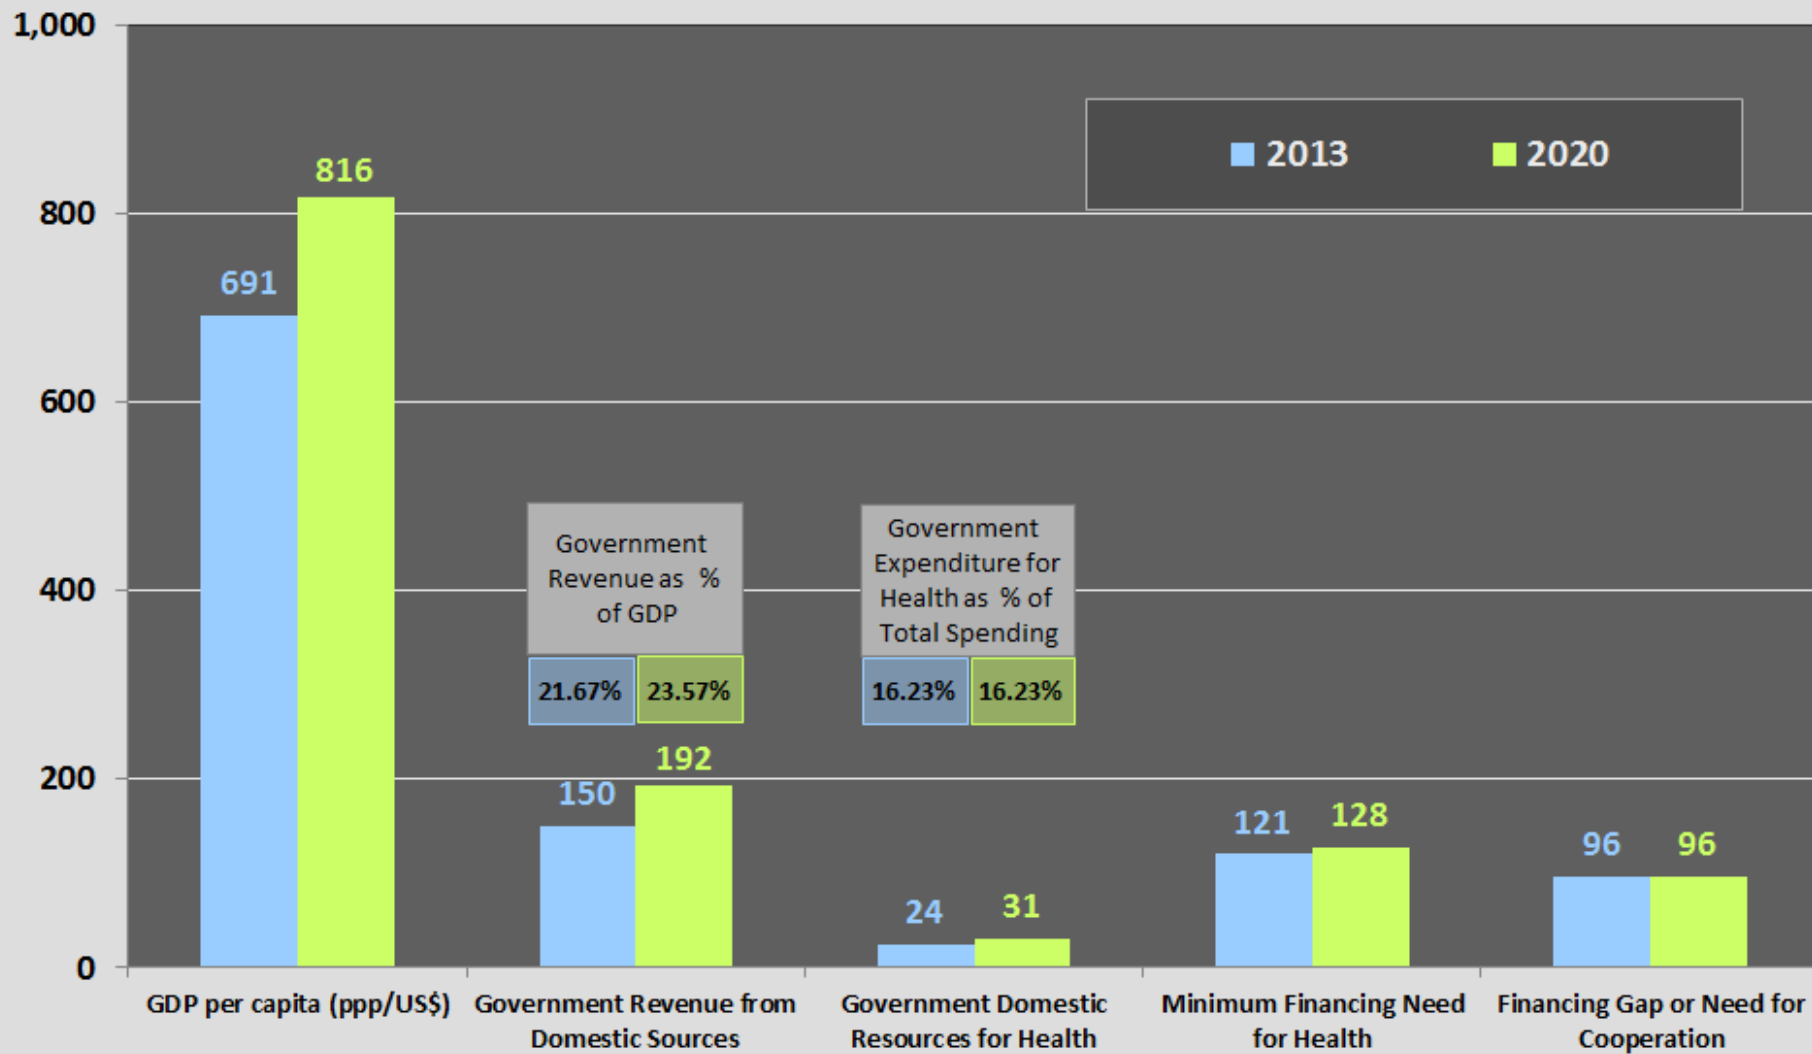

Government Expenditure on Health per Capita as percentage of the Average of DAC/OECD Members according to Availability of Data, 2013

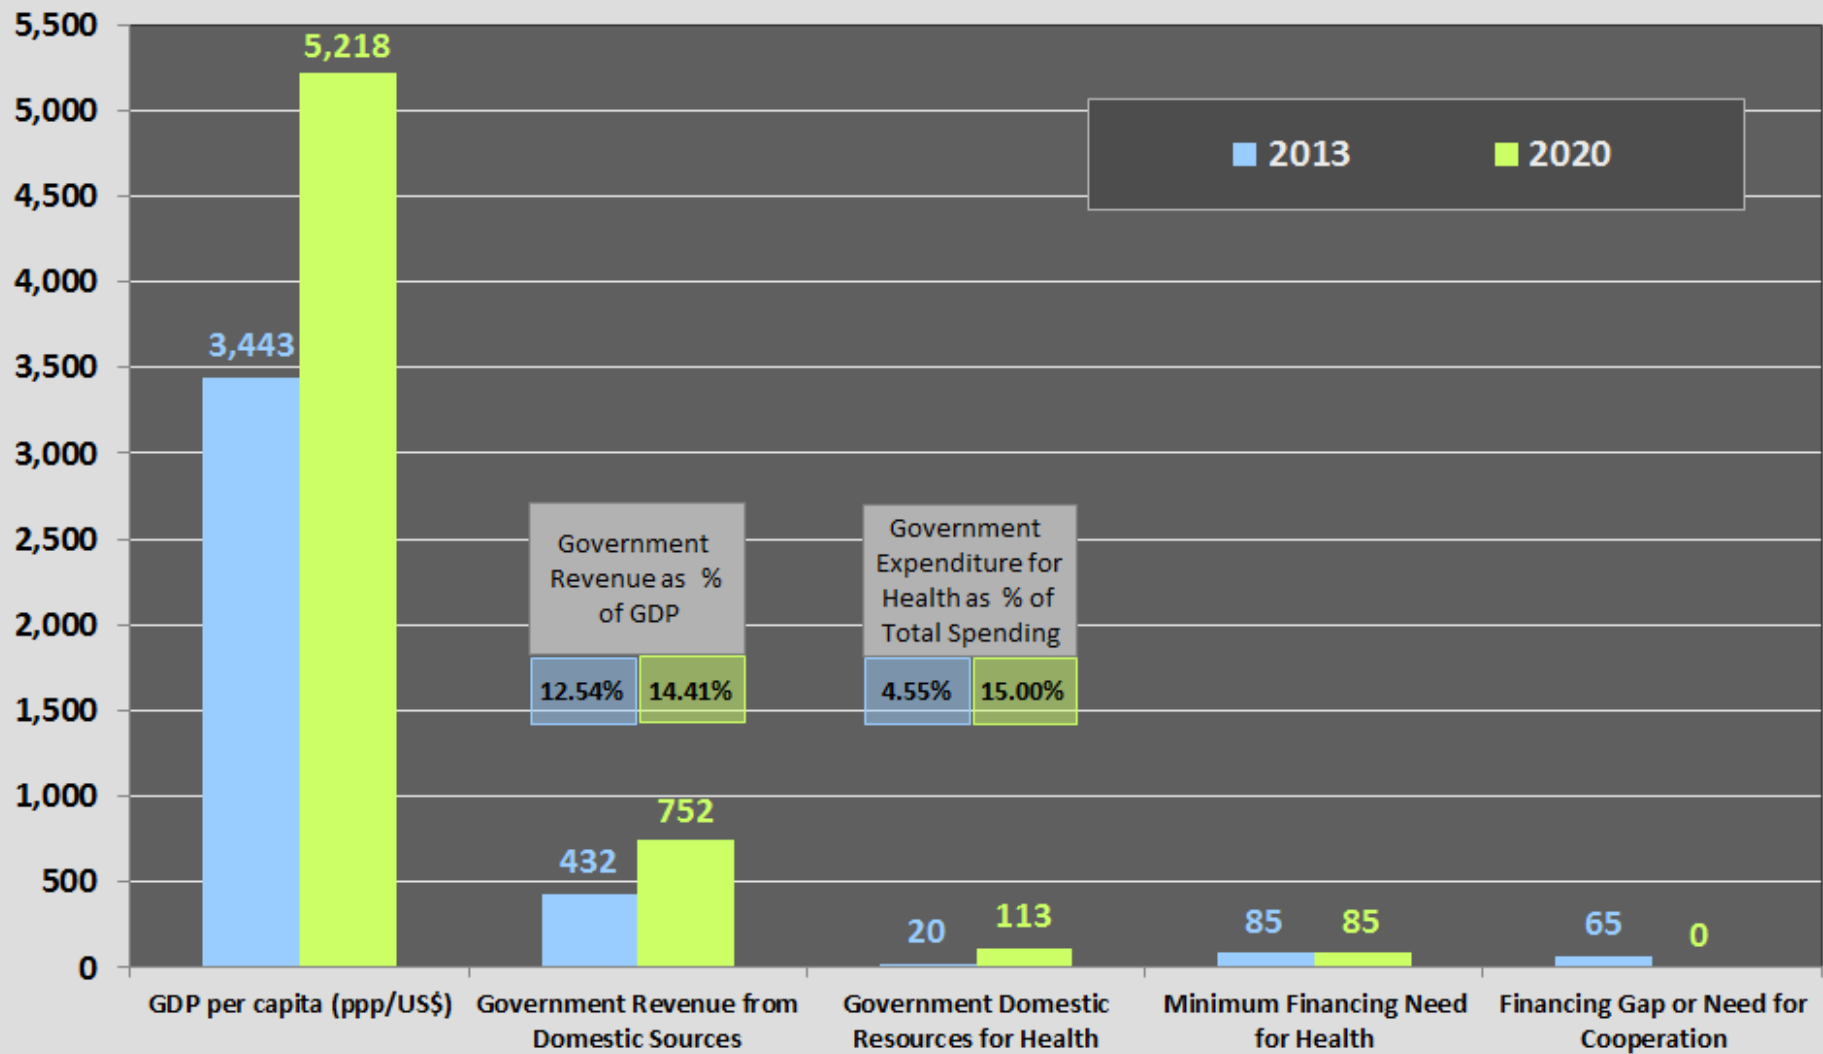

Tanzania: Projection of Government Expenditure for Health funded with Domestic Resources and Financing Gap

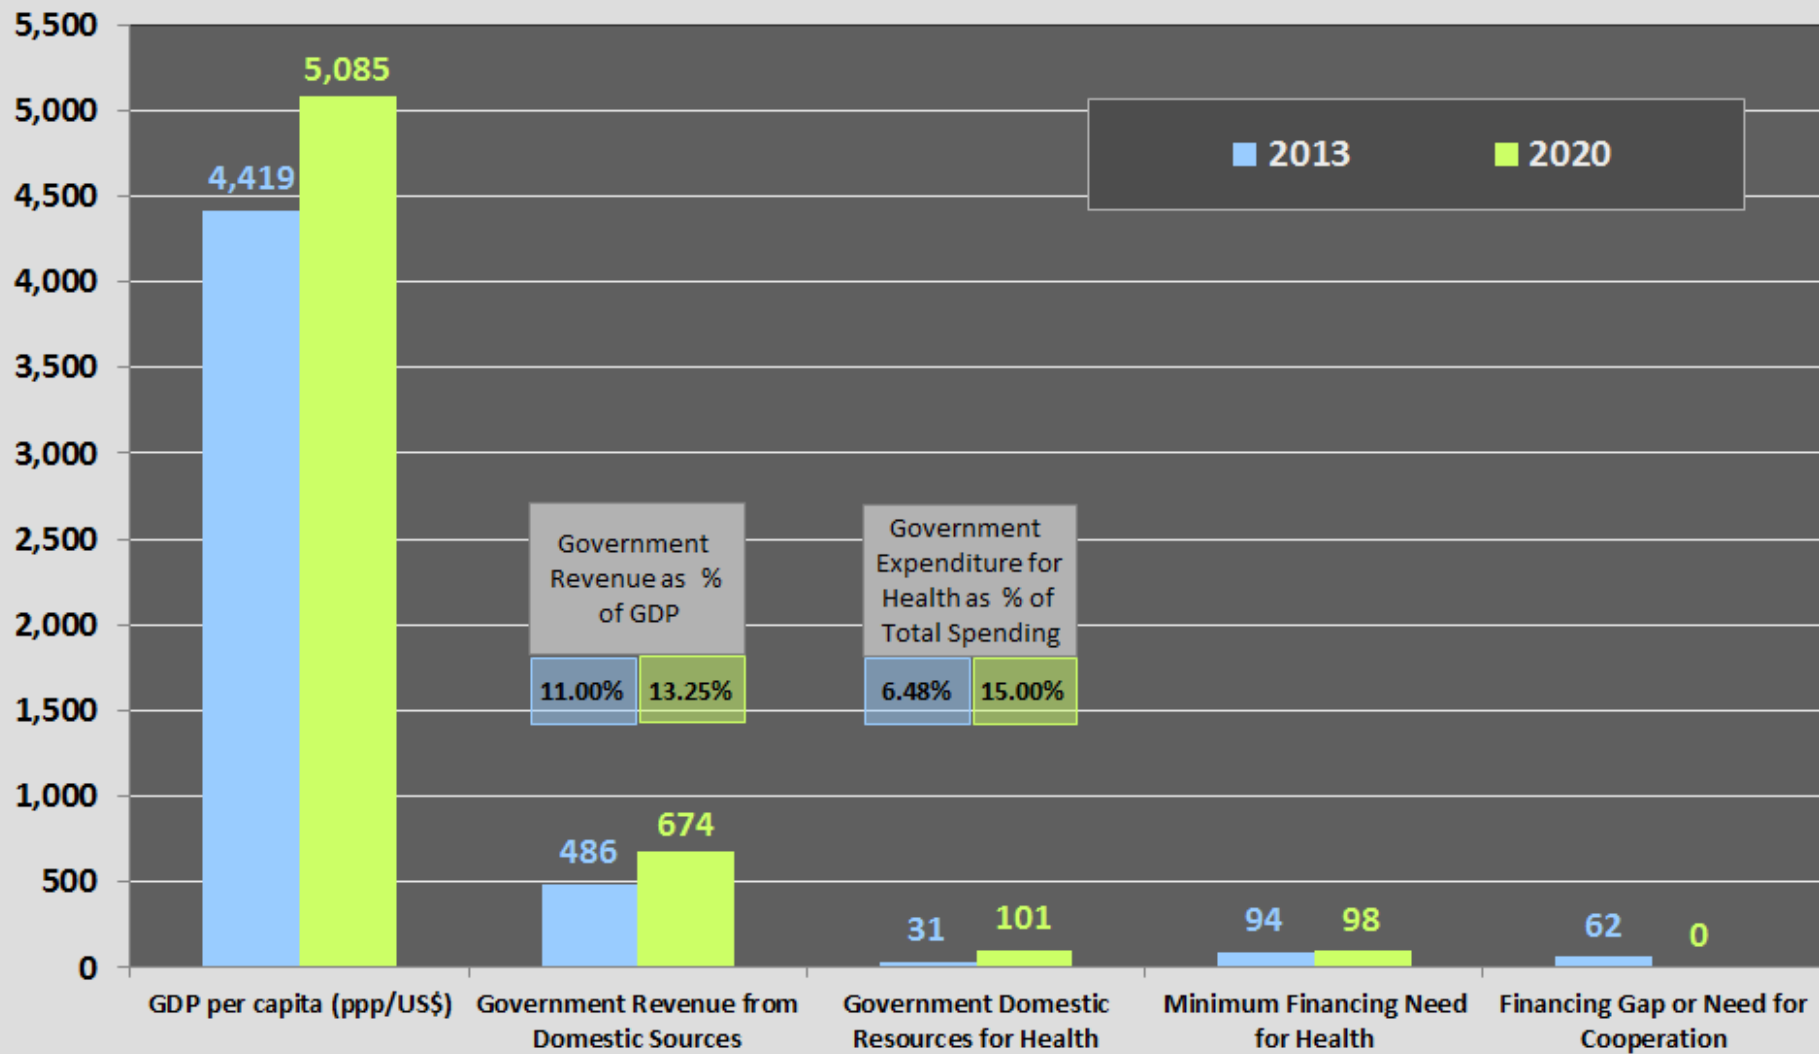

Malawi: Projection of Government Expenditure for Health funded with Domestic Resources and Financing Gap

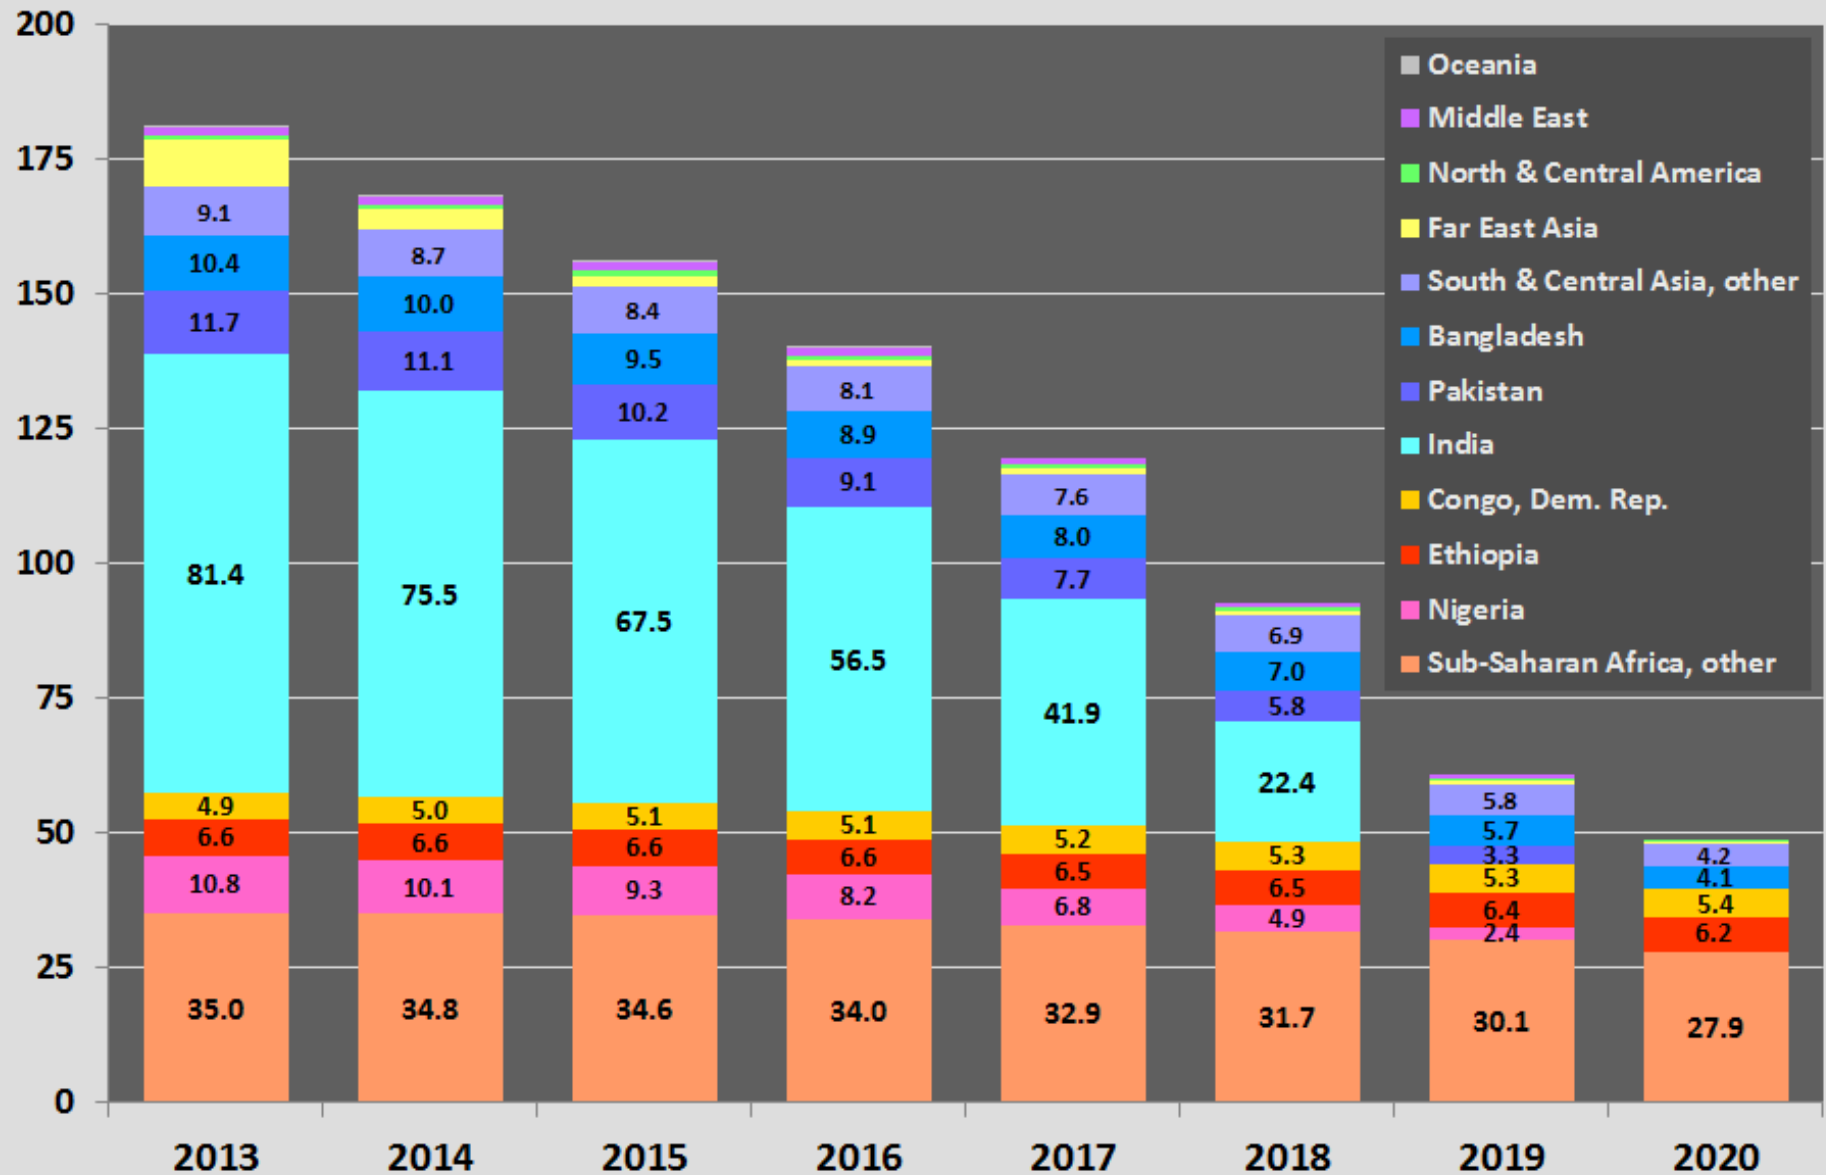

India: Projection of Government Expenditure for Health funded with Domestic Resources and Financing Gap

Nigeria: Projection of Government Expenditure for Health funded with Domestic Resources and Financing Gap

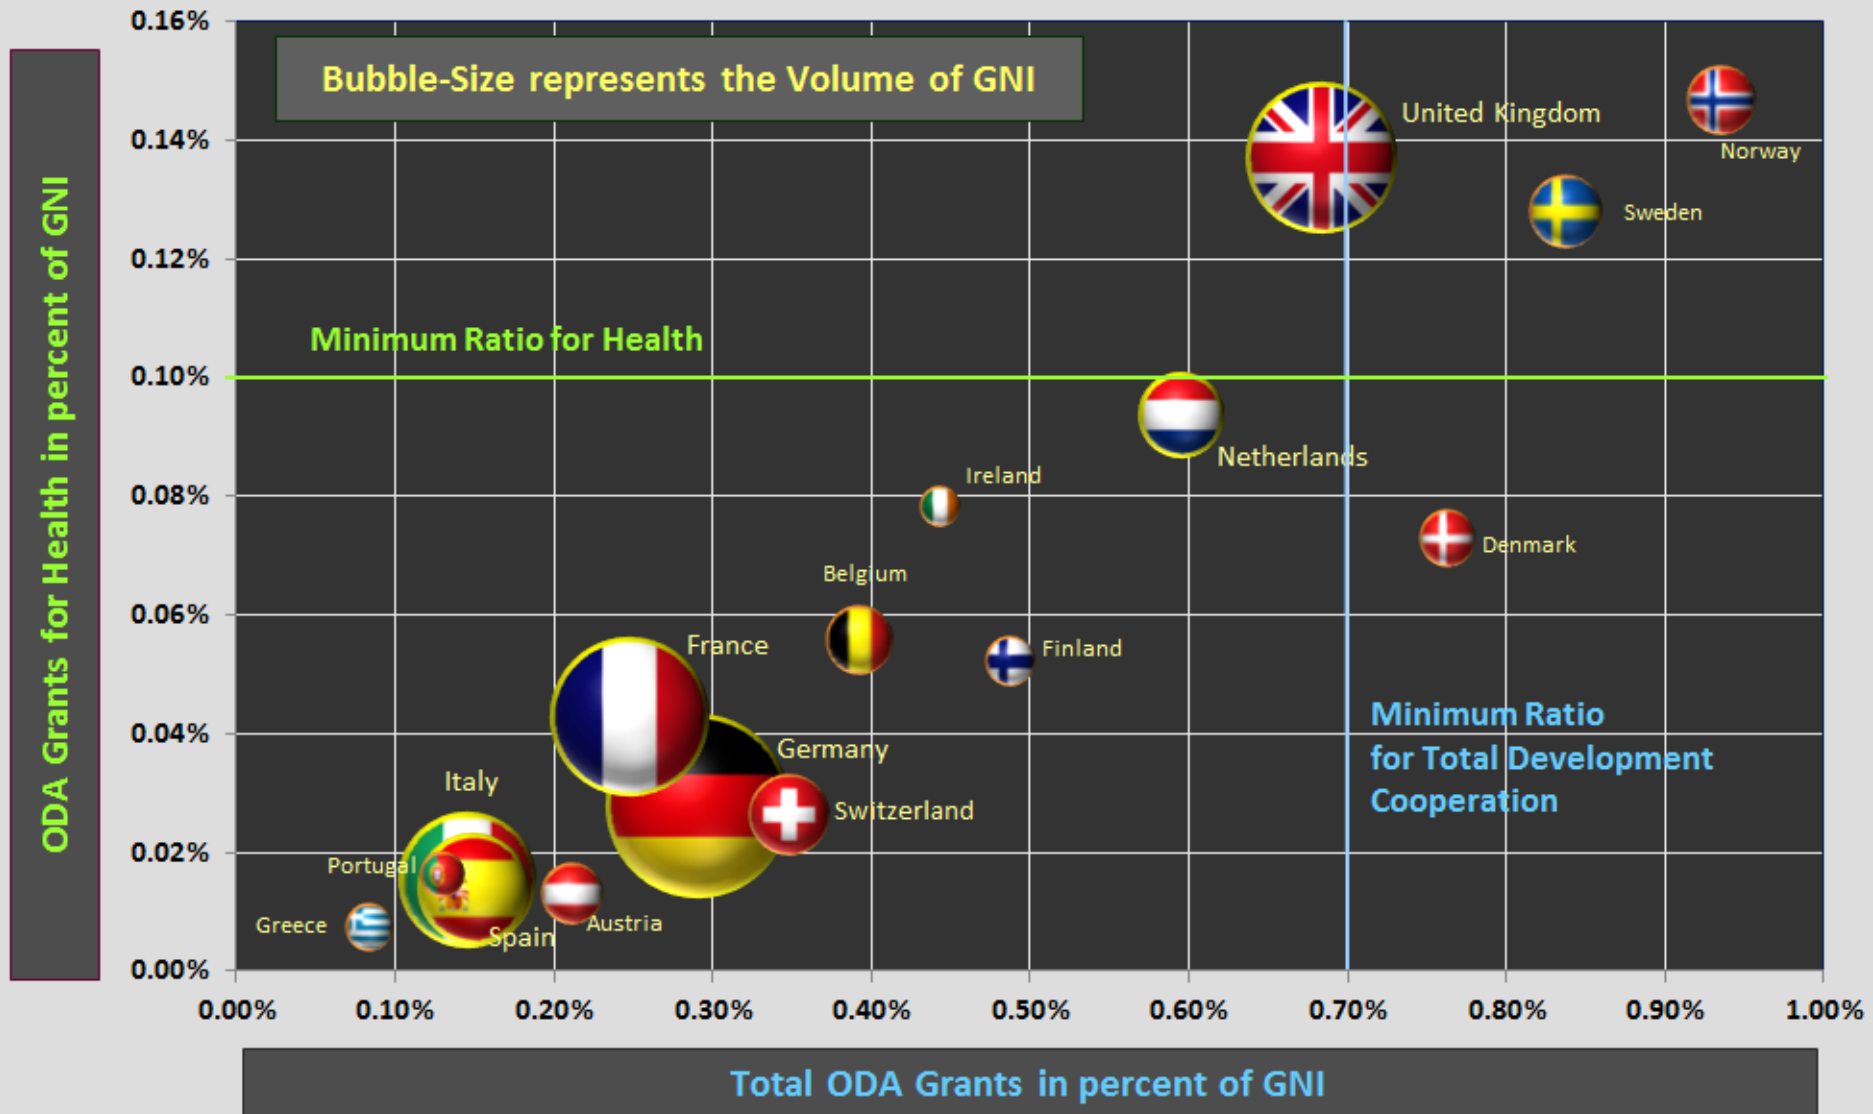

Reduction of Health Financing Gap in case of Achieving Projected Economic Growth and Recommended Targets of Domestic Resource Mobilization, in billion \$

Source: WEO Oct 2015, WDI, GHE, own calculations, combining amounts based on power purchase parities and exchange rates

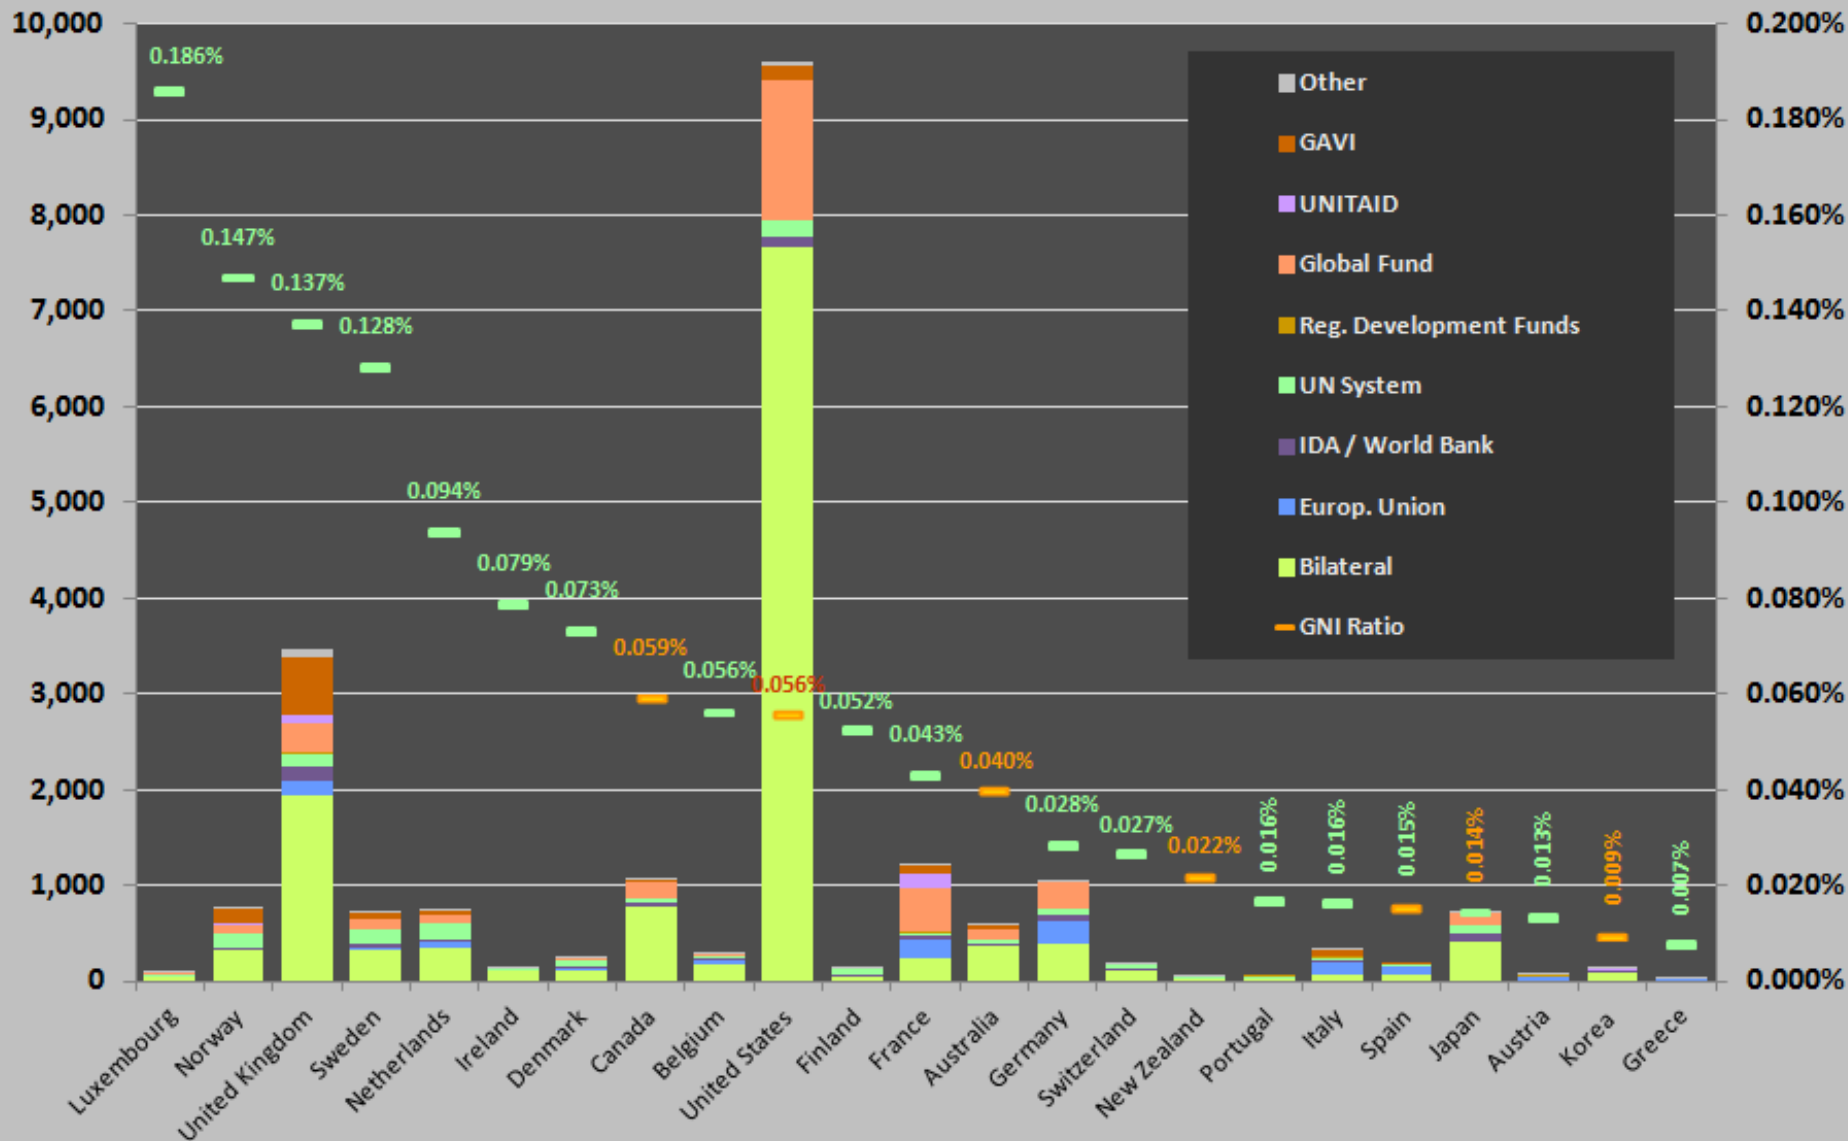

ODA Grants provided by European DAC Countries in relation to Economic Capacity measured by Gross National Income, in 2013

Source: DAC/OECD, own analysis based on review of all health-relevant projects and aid activities; the calculation of grants takes account of the balance of budgetary resources involved in ODA lending including the repayment of interest

DAC Members: ODA Disbursements for Health in Million US\$ and GNI Ratio in 2013

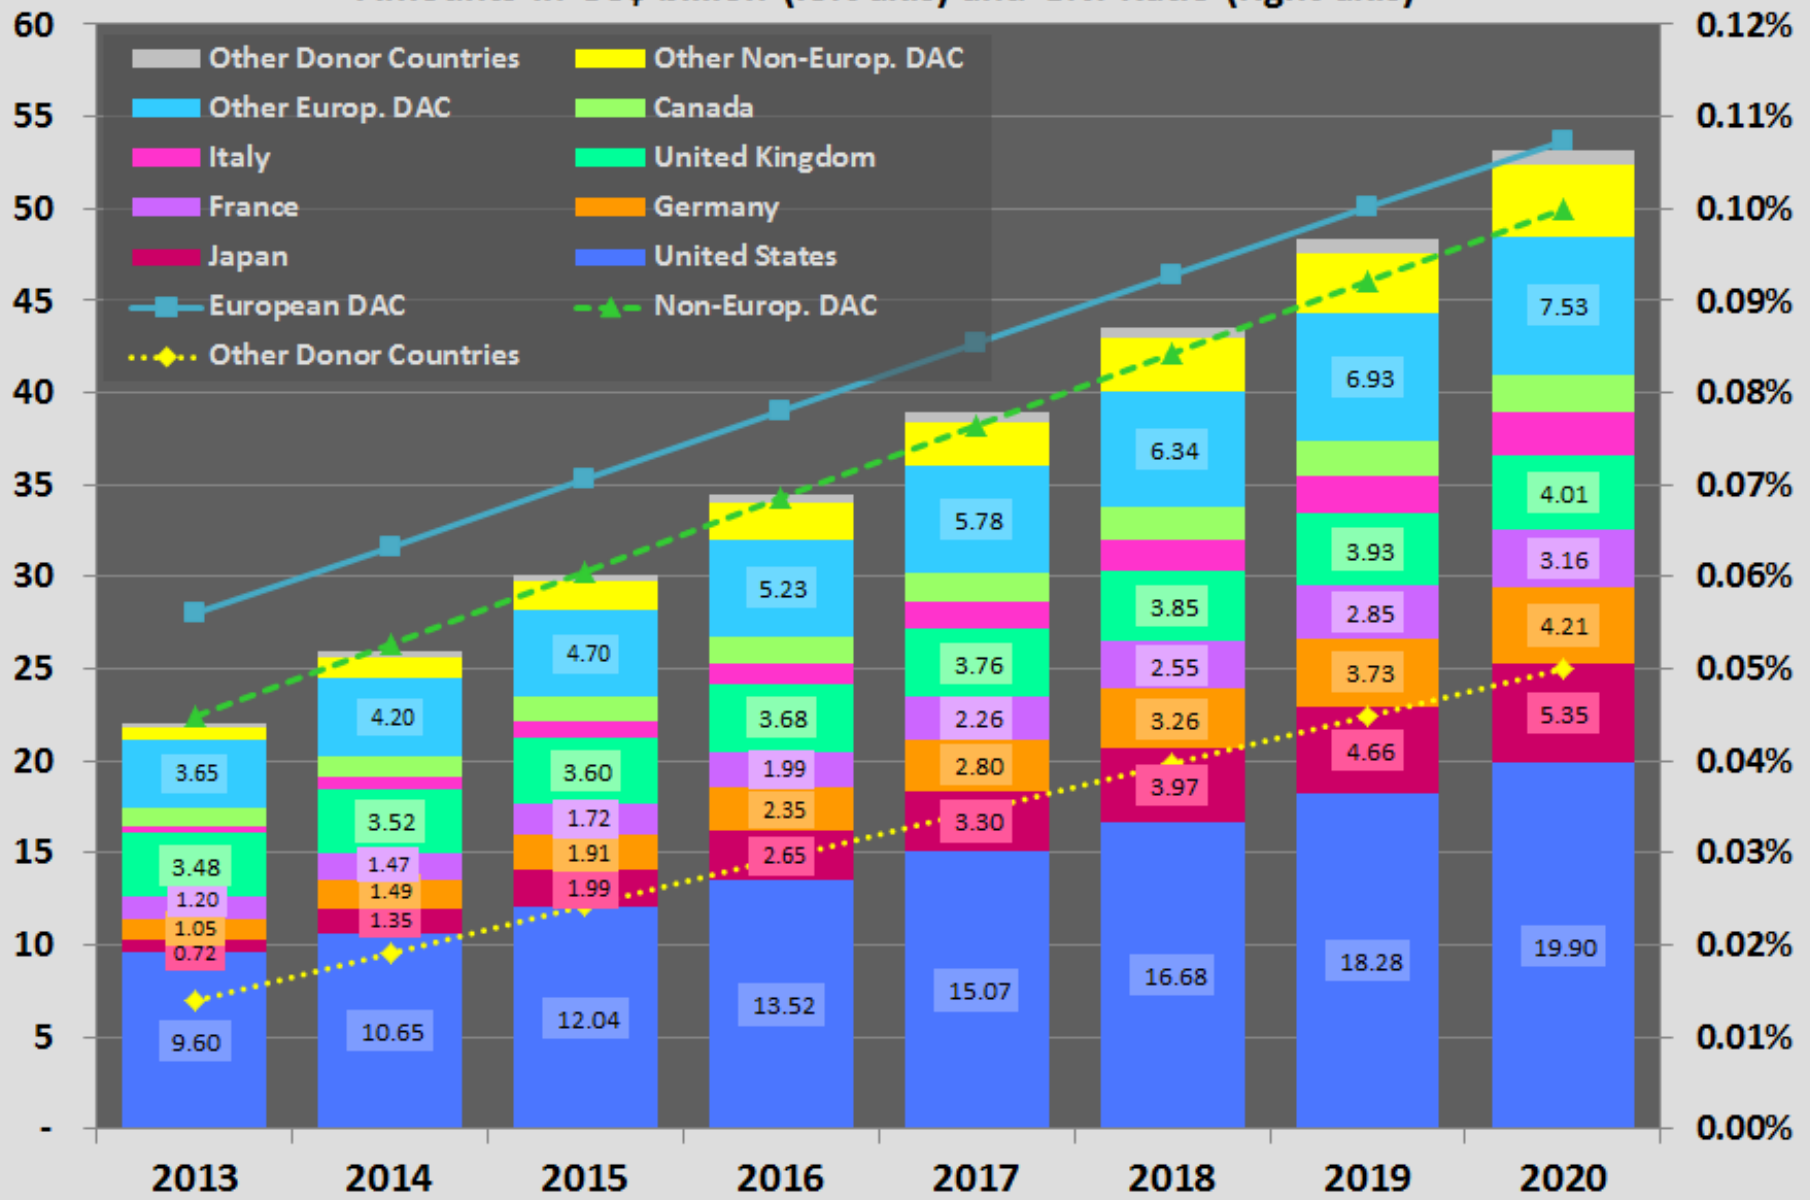

calculations of bilateral health ODA and health share of multilateral contributions based on review of individual aid activities

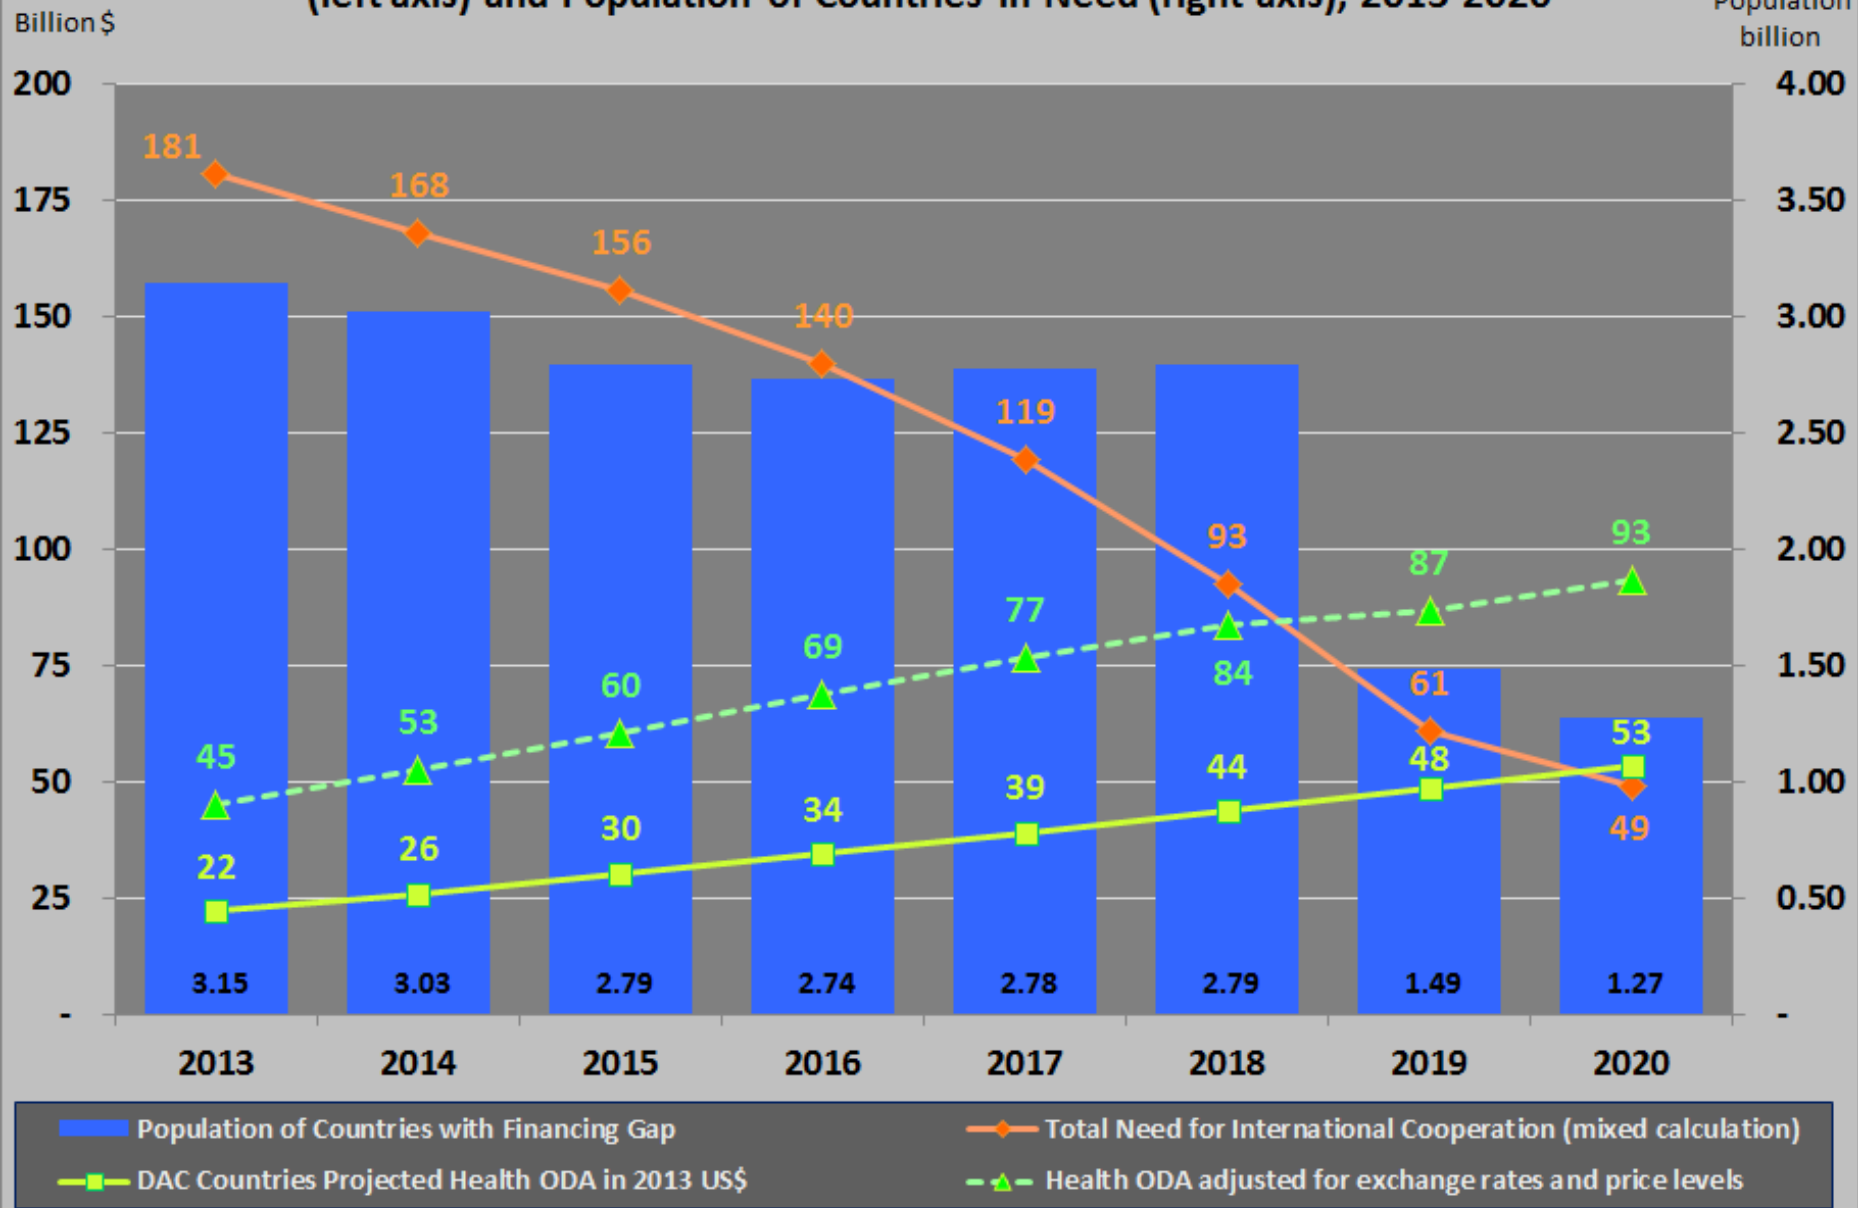

¹⁾ bilateral health ODA calculated on the basis of official reporting for: Australia, Canada, Japan, Korea, New Zealand and United States

ODA for Health in case of Providing 0.1% of GNI by 2020

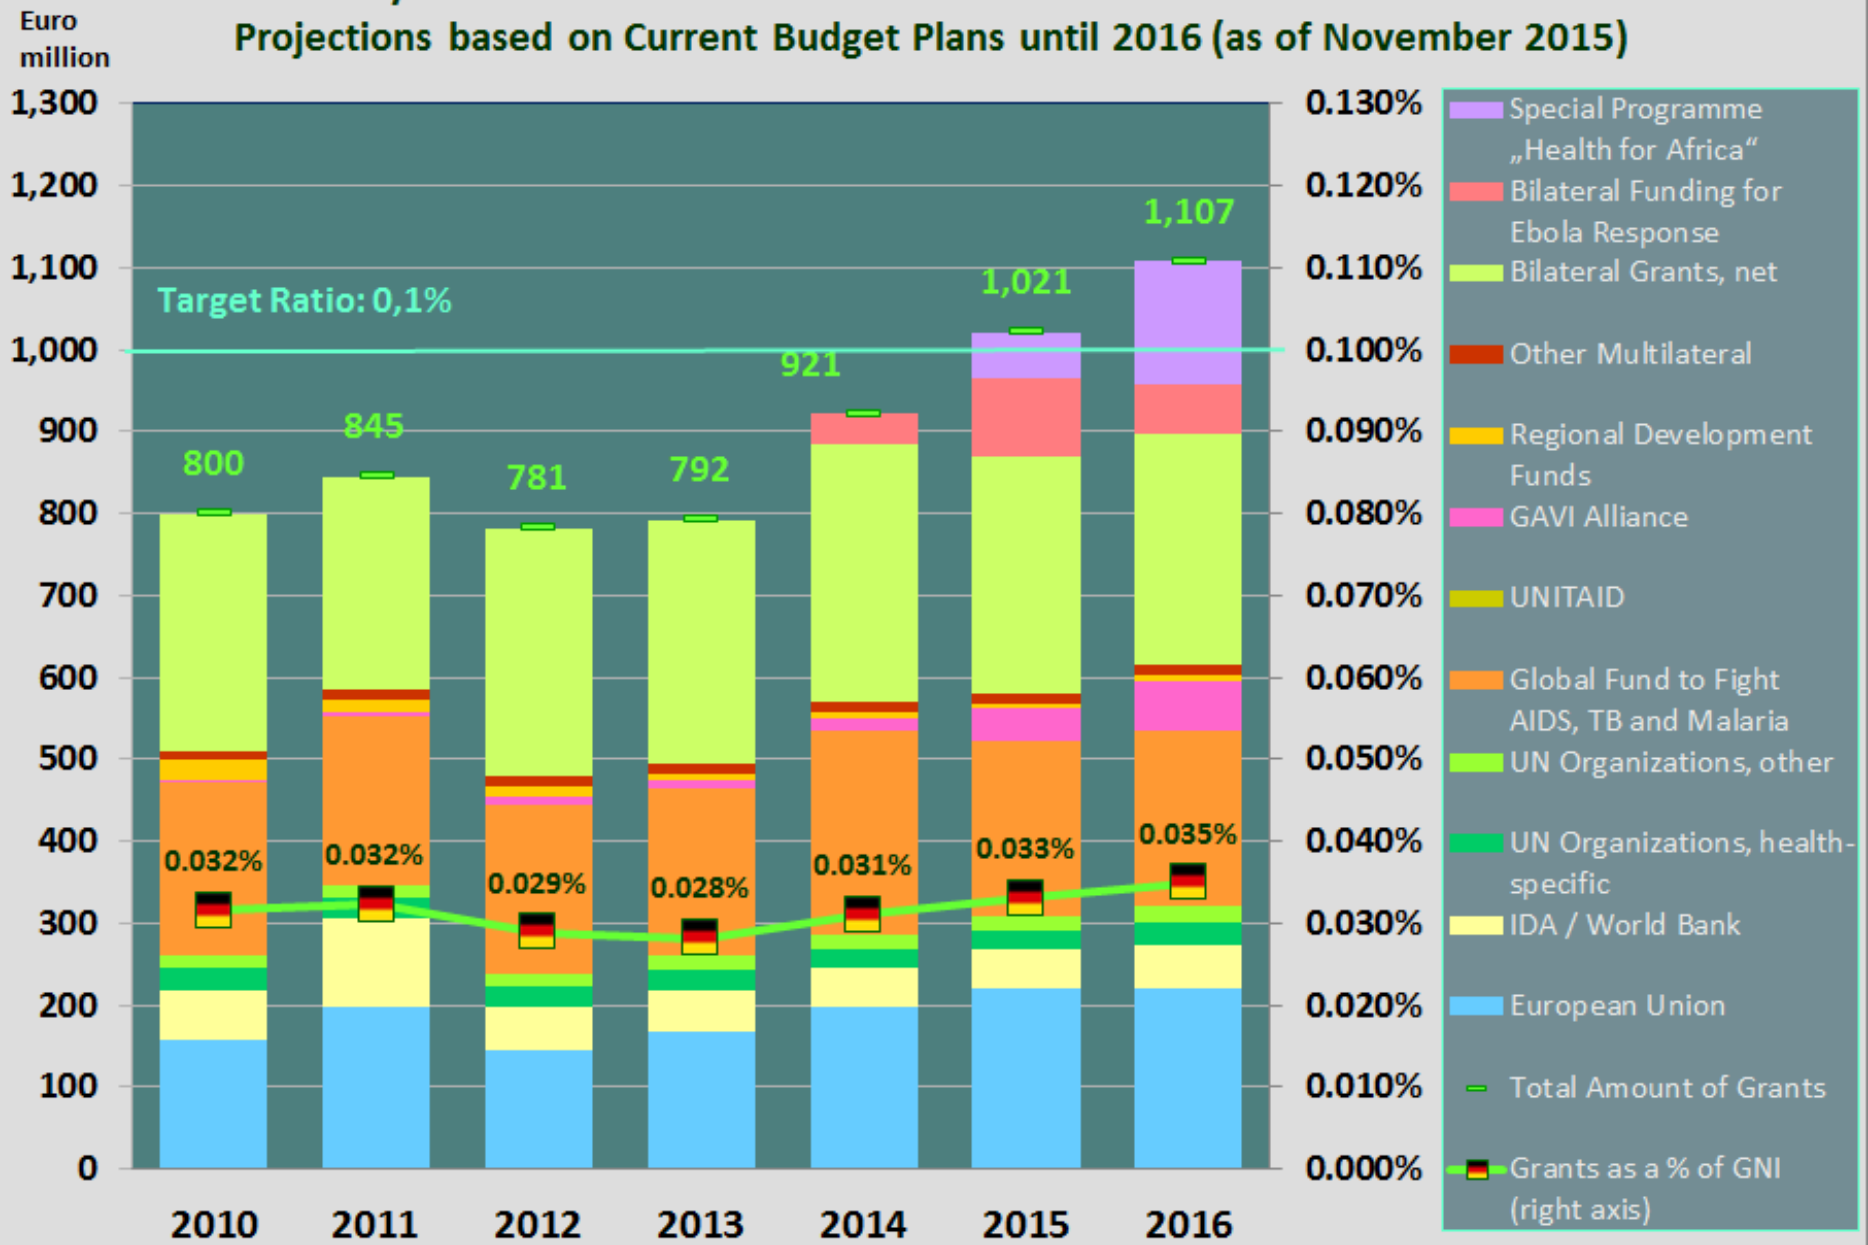

Amounts in US\$ billion (left axis) and GNI Ratio (right axis)

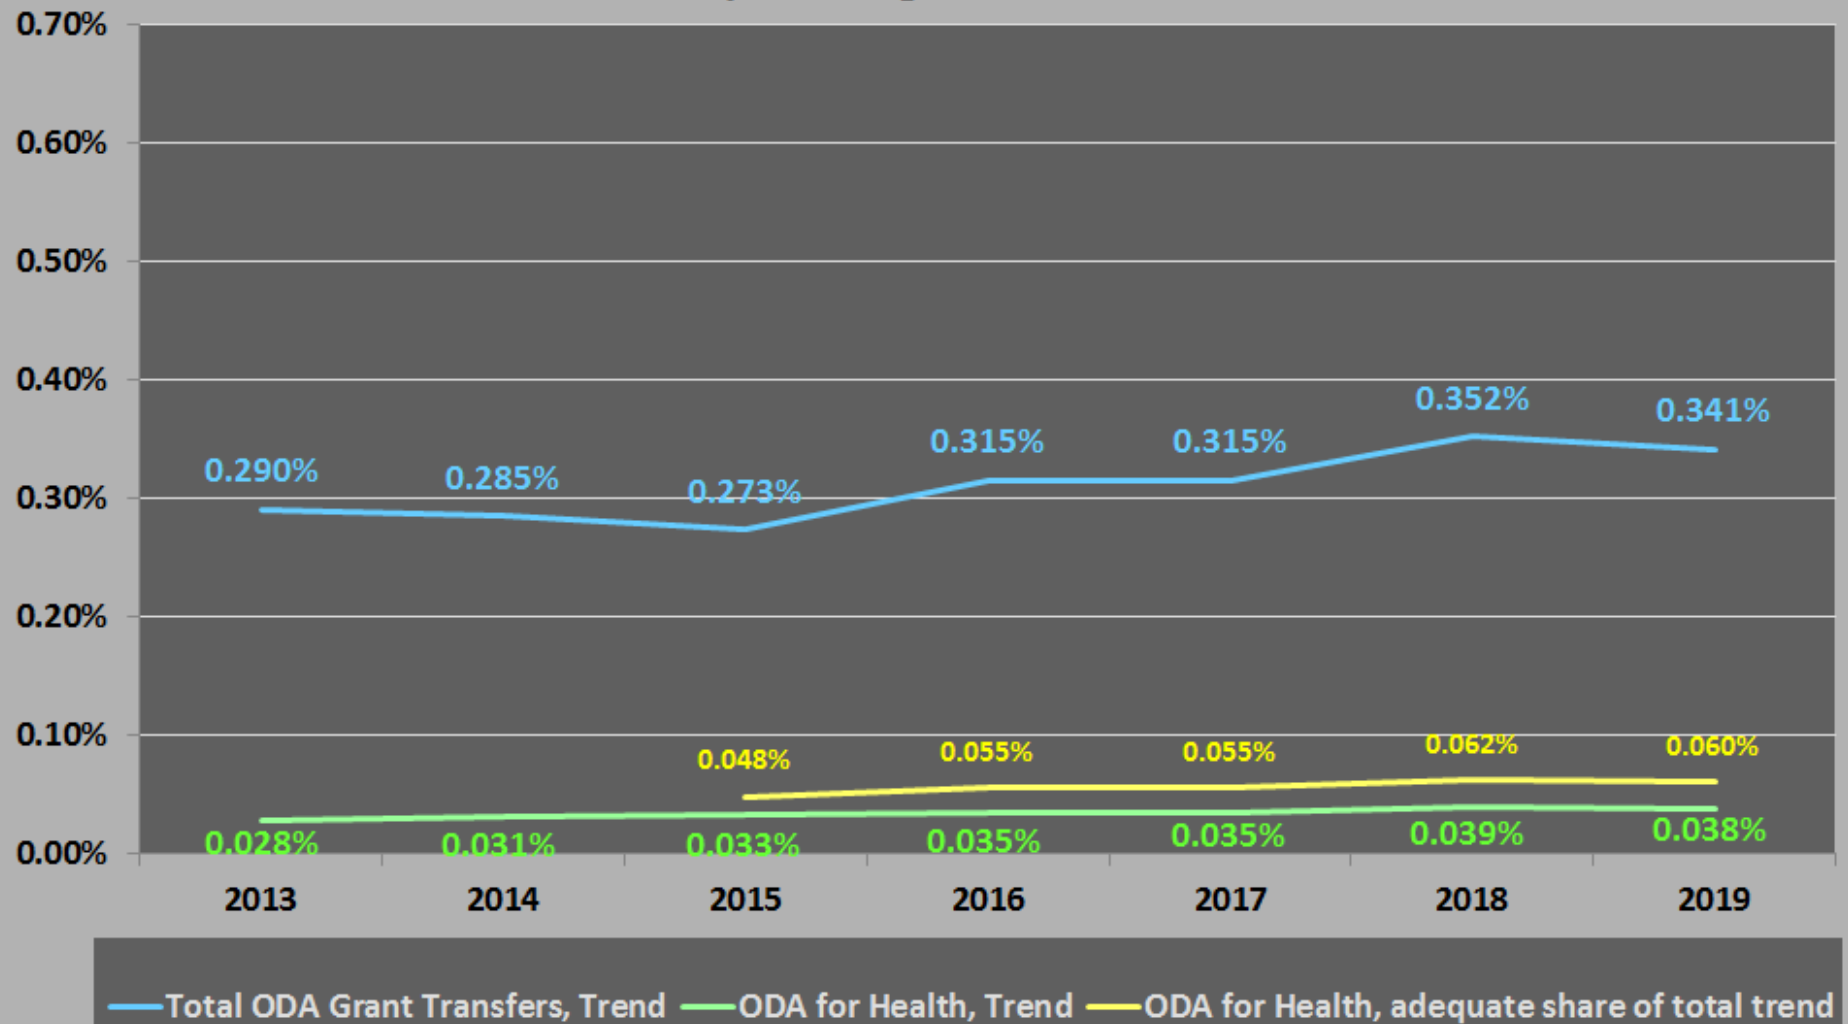

Projected Need for International Cooperation versus Expected ODA for Health (left axis) and Population of Countries in Need (right axis), 2013-2020

Germany's ODA Grants for Health: Calculated Disbursements until 2013 and Projections based on Current Budget Plans until 2016 (as of November 2015)

Germany's Financial Efforts according to Recent Budget Decisions: Projected ODA Grants as percentage of Gross National Income

For detailed information including country-specific data on ODA contributions for health promotion and HIV response, mobilization of domestic resources for health, and projected health financing assuming fulfilment of targets go to:
